

## SACBH - KEITH STORAGE FACILITY

The two 22,500 Tonne Storage Sheds located at Keith were constructed as a grain storage and handling facility at Keith for SACBH. The sheds were located adjacent to existing bunkers and have a total capacity of approximately 45,000 tonnes segregated into 5 parcels each.

The work by CATCON involved earthworks, construction platforms, concrete walls, extensive structural steel fabrication, erection of the roofs and the installation of metal claddings. Associated road works, mechanical, electrical and civil works completed the large scale grain storage facility.

## QUICK FACTS

- >> Grain storage and handling facility
- >> Located in Keith, 227km SE of Adelaide
- >> Each shed holds 22,500 tonnes of grain
